OBSERVATIONS

Marble table top: as it is a natural product, variations in tone, colour, granularity and pattern may occur. Because of this, the sample may not exactly match a slab or finished product.

Travertine table top: one of the key characteristics of natural travertine is the holes and pits gracing the surface and inside of the stone. These random holes present in natural travertine are considered normal characteristics of this stone and therefore not defects.

As this is a handmade product, there could be a small gap between the top and the base.

Bespoke sizes are available under consult.

Product sizes may vary up to 2 cm.
