

Environmental statement

Dooq constantly invests in new solutions with the aim of preserving the environment. Our products are designed considering a series of ecological, health and sustainability criteria. All of our products are manufactured locally in our certified production facility.

All items are designed minimizing the number of components and maximizing the number of interchangeable parts. Dooq prioritizes the use of recyclable and environmentally sustainable materials, as well as clean production processes. The company classifies, separates and recycles all the waste it generates.

To avoid unnecessary waste and minimize the use of energy and natural resources, Dooq products are designed with a timeless aesthetic, away from short-term trends, to be durable. The products are subjected to tests, in independent laboratories, to ensure they meet strict international standards for quality, safety and durability.

Dooq, Ida. is committed to manufacturing products that help create healthier, safer and more sustainable environments. The company continually invests and works to replace hazardous or harmful chemicals in its products as they arise new, safer and greener alternatives.

With all this, Dooq shows its full commitment to health, the environment and excellence towards the client.
