**marbles
for top side table**

Travertine

Red travertine

**plywood
veneer
for base sidetable**

Natural ash

Camel Oak

One of the key characteristics of natural travertine is the holes and pits gracing the surface and inside of the stone. These random holes present in natural travertine are considered normal characteristics of this stone and therefore not defects. L'anamour is handmade one by one, therefore there may be some differences in wood marquetry from piece to piece, that are not considered defects but normal features of the product. Many finishes are applied by hand and may vary in color, tone and character. Images on the catalogue or website may vary from the final product.
